Equipment List

Prepress

- 2 x Kodak Magnus 800 Quantum Platesetters
  with SQUAREspot thermal imaging technology
- 2 x Epson Stylus Pro 9900 Inkjets
  X-Rite SpectroProofer in-line colour measuring
- Epson Stylus Pro 9880 Inkjet with
  Kodak Double-sided Media Guide
  X-Rite i1iO Automated Scanning Table
- Canon ImpoProof iPF8400S two sided Inkjet
- Xerox Color 550 Production Printer
- 12 x Apple and PC workstations
- 4 x X-Rite eXact Advanced Spectrophotometer
- Scitex Eversmart Series II Flatbed Scanner

Offset Printing

41" 6-colour Heidelberg XL 106
Plus Anilox Aqueous Coater with Intellistart
Maximum image size: 29" x 41"
Maximum sheet size: 29.5" x 41.25"

41" 6-colour Heidelberg XL 105
Plus Anilox Aqueous Coater
Maximum image size: 29" x 41"
Maximum sheet size: 29.5" x 41.25"

20" 5-colour Heidelberg SM 52
Plus Aqueous Coater
Maximum image size: 13.375" x 19.875"
Maximum sheet size: 14.125" x 20.5"

20" 2-colour Heidelberg GTO 52
Maximum image size: 13.375" x 19.875"
Maximum sheet size: 14.125" x 20.5"

- Colormatic Automatic Ink Dosing System

Large Format Printing

- Agfa Jeti Tauro 3300 LED, 7 colours sheets/rolls
- Agfa Jeti Tauro 2500 LED, 7 colours sheets/rolls
- Agfa Jeti Titan HS, 8 colours sheets only
- Fuji Inca Onset X1, 8 colours sheets only
- Fuji Uvistar, 9 colours sheets/rolls
- Epson Plotter, 8 colours rolls only
- Epson Eco Solvent, 8 colours rolls only

Screen Printing

- 1 Col. Press Serifast
  Maximum image 44.5" x 69.5"

Digital Printing

- 2 x Xerox iGen5 150 with Matte Toner
  and 24pt heavy media kit
  3 additional colours (Orange, Blue & Green)
  Plus White Toner and Spot Clear Coating –
  14.33" x 26"
- Xerox Iridesse, Colour and Black with Clear Coating,
  White, Metallic Silver, Metallic Gold.
  Maximum automatic size – 13" x 19.2"
  Maximum manual sheet size – 13" x 47.24"
- 2 x Konica Minolta Bizhub Pro 1250
  Black only – 12.7" x 19"
- 3 x Kodak Digimaster HD 150
  Black only 18" x 14"
- Digital Kodak Press, E-150 with MICR Capabilities

3D Printing

- MakerBot® Replicator®
  Desktop 3D Printer
- Mcor IRIS True 3D Colour Printer

Scodix Ultra Pro with Foil

- 21.5" x 31" Max sheet size & 11.7" x 16.5" Min sheet size
- 19" x 29" maximum UV and foil image size
- We can run multiple coloured foils simultaneously
- Coated or laminated stocks only
  (some uncoated stocks have just been approved to run)
- 6-30pt

Highcon Euclid II+

- 40" x 28" max – 12.5" x 18" min
- Coated, laminated and uncoated stocks
- 8-24pt label and paperboard stocks
- Up to 47pt microflute

Off-line Coating Devices

- EPIC CTi-635 off-line Coater
  Coater does spot or overall Aqueous or UV
  14.33" x 26"
- TEC Lighting off-line UV Coater
  28" x 40"

Die-cutting, Foil Stamping and Blind Embossing

- Heidelberg Platens 10" x 15"
- 5 x Heidelberg Platens 13" x 18"
- Heidelberg Cylinder 21" x 28"
- Heidelberg Cylinder 22" x 30.25"
- Heidelberg Promatrix CS Die-Cutter 29.25" x 41.5"

Lamination

- Kala Arkane D Hot & Cold Laminator
- Kala Applikator Flat Bed Laminator & Mounting Table
- Hot or cold lamination/ encapsulation up to 65" wide

Finishing

- Muller Bravo 8 Pocket Plus Cover & 2 Hand Fed Stations
- Muller Martini Minuteman Stitcher, 6 Pocket Plus Cover & Hand Fed Station
- C.P. Bourg Perfect Binder, BB3002
- 2 x 45" Polar Programmable Cutters, with Complete Cutting System, Stacker, Jogger, Weigh Scale, Trans-o-mat
- 55" Polar Cutter with Complete Cutting System
- Guillotine/max. 110" width
- 4 x MBO Folder B30-C
- 2 x MBO Folder T530-C
- 3 x Multi-Head Hydraulic Drills
- 3 x Automatic Pallet Wrappers
- 3 x Shrink Wrappers
- 2 x Manual RBS L-Bar Sealer
- 2 x RBS L BAR Poly Sealer, MM & EM
- Poly-Bagger, RBS
- 2 x Eyeletters, 1 Riveter
- 2 x Bostitch Stitchers
- 2 x Hydraulic Round Cornering Machines
- HMA Hot Melt, 2 Head Glue System
- XY Super wide, high speed cutter
- 3 x CNC Digital laser cutters
- Matic Ares Plus 14' welder

Photo Studio

- Nikon D800 Full-Frame 36 Mega-pixel cameras equipped with Nikkor AF-S 24-70mm ƒ/2.85F-ED Full-Frame Zoom Lens
- Fujifilm FinePix S5 Pro equipped with AF-S DX NIKKOR 18-55mm ƒ/3.5-5.6G VR II and Sigma 70-200mm ƒ/2.8 EX DG OS HSM Lens
- Elinchrom portable studio lighting system with and without flash attachments
- Apple 27" iMac with photo editing software
- Scitex Eversmart Series II Flatbed Scanner

Mailing

Finishing Inserters

- 2 x Buhrs Highspeed Inserters BB700 with Camera match and verification
- 4 x 6 Station Swing Arm Inserters with 9" x 12" Capabilities
- 3 x Kirk Rudy Tabmaster with wide label kit
- Kirk Rudy Servo Tipper, 497 Servo Tipper
- Kirk Rudy STS Gluer – (2) head fugitive
- C.P. Bourg Perfect Binder, BB3002
- Shrink Wrapper, Sealmatic 56-T
- Poly-Bagger, RBS
- Kirk Rudy – NetJet Large Format Multi-Head Highspeed Inkjet
- Buskro – BK600 Inkjet System
- Kirk Rudy – NetJet Inkjet System
- Axode Camera Match System
- 3 x Mosca Strapper
- Strappack
- 2 x Kirk Rudy Bump Turns, 415
- 2 x RBS L BAR Poly Sealer, MM & EM

Printing Techniques

- Conventional Offset Lithography
- CJ Hi-Lite©
- Stochastic: 10, 20 and 35 micron
- Hexachrome

CJ GRAPHICS
COMMUNICATION SOLUTIONS

>>> **OFFSET PRINTING**
A Division of CJ Graphics Inc.

CJ Graphics Inc. (Communication Solutions), enjoys a solid reputation in our industry for quality work that reflects our dedication to craftsmanship partnership and responsibility.

From the beginning, our dedication to excellence has led us to set the highest production standards and to settle for nothing less than premium results in our manufacturing. CJ Graphics Inc. is one of the most recognized printers in North America, winning thousands of print awards in our long and distinguished career.

At CJ Graphics Inc. we invest in state-of-the-art equipment and offer a broad range of services in-house. Whether your printing project calls for one colour or multi-colour, die-cutting, hand finishing, letterpress, embossing, hot foil stamping or electronic prepress, we have the experience, the capabilities and we will be competitive.

CJ Graphics Inc.'s success has been built on the lasting relationships we have established with our clients for almost four decades. Our approach is one of partnership. We like to get involved with projects early on, and if we can improve a job through our expertise, then we're happy to do so. This point of view often allows us to turn challenge into opportunity. It's why we like unusual requests and impossible deadlines.

CJ Graphics Inc. is a proud member of:
- CPIA (Canadian Printing Industries Association)
- OPIA (Ontario Printing and Imaging Association)
- PIA/GATF (Printing Industries of America/ Graphic Arts Technical Foundation)
- FSC (Forest Stewardship Council)
- IDEAlliance G7 Master Printer Qualified Facility

COLOUR TECHNOLOGIES
A Division of CJ Graphics Inc.

As one of North America's leading prepress companies, Colour Technologies provides exceptional service with a fully integrated PDF workflow. Our award-winning company will transform your concept to finished product with quality control procedures and leading-edge technology.

The Kodak Prinergy system allows clients to upload files securely to our ftp servers. Our prepress specialists will preflight your project source files or industry standard print ready PDF files. Have a last minute edit to content or colour? No problem, our technicians can assist in page assembly, type changes, colour correction, image retouching and manipulation. Services include high resolution scanning, digital image capture at our in-house CJ Photographic Studio, and a wide variety of proofing options including:

• Remote soft proofing.
  Kodak InSite Prepress Portal System.
  Secure web access to the Kodak Prinergy Workflow.

• Epson Stylus Pro ink jet plotters.
  G7 Master EFI Fiery XF and Kodak Matchprint Certification.
  High resolution contract colour proofs.

• Two sided lower resolution ink jet plotters and
  Xerox printers are used for project imposition and
  mock-up proofing.

• Certified running to GRACoL standards.

• IDEAlliance G7 Master Printer Qualified Facility.

Colour Technologies is proud to be a socially and environmentally responsible company, and as such, has obtained Forest Stewardship Council (FSC®) Chain-of-Custody certification.

COMPUTER TO PLATE

Our computer to plate department can produce many different plate types and sizes. Featuring automated loading, processing and a variety of screening options including 10 micron Stochastic screening. Colour Technologies employs state-of-the-art computer workstations with Kodak, G7 and Heidelberg process controls. With project automation, secure digital asset management and a high speed broadband Internet connection, projects can be processed with speed and accuracy, minimizing turn around time.

PREPRESS

CJ GRAPHICS
COMMUNICATION SOLUTIONS

CJ LARGE FORMAT DIGITAL
A Division of CJ Graphics Inc.

CJ Large Format produces and installs a wide variety of displays and graphics, including posters, retail P.O.P., event graphics, trade show displays, floor graphics, transit shelters, wall murals, building wraps, step & repeat backdrops, mesh and vinyl banners, backlits, window graphics, vinyl cut decals, pallet programs directional signage, and interior design.

CJ Large Format uses VariDot and greyscale Versadrop imaging technology that enables a print head to produce dots of variable sizes versus print heads using fixed droplet technology. VariDot technology creates these variable dots by dispensing ink droplets that vary in size from 6 to 42 picolitres.

The ability to vary the droplet size to as little as 6 picolitres produces sharp images with smoother gradients and quarter tones. The ability to jet large droplets up to 42 picolitres produces dense, uniform solids. The result is near photographic image quality with sharpness only before seen at resolutions of 1440dpi and higher.
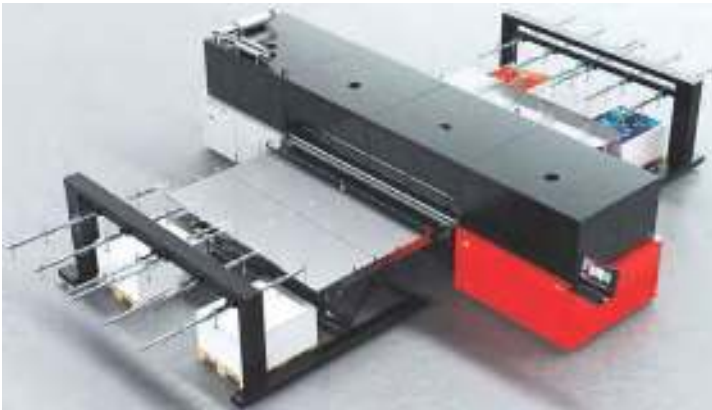

Agfa Jeti Tauro 3300 LED fully automated

Our multiple digital cutting systems can cut most rigid surfaces with its 2.36" clearance for processing materials up to 2" thick (50mm). Perfect for cutting, creasing and routering prototypes, with precise shape cutting of vinyl, corrugate, composite boards, plastics (polypropylene), foam, wood and metal-based products.

Digital Precision CNC Die-cutting

LARGE FORMAT PRINTING

• Agfa Jeti Tauro 3300 LED, 7 colours sheets/rolls
• Agfa Jeti Tauro 2500 LED, 7 colours sheets/rolls
• Agfa Jeti Titan HS, 8 colours sheets only
• Fuji Inca Onset X1, 8 colours sheets only
• Fuji Uvistar, 9 colours sheets/rolls
• Epson Plotter, 8 colours rolls only
• Epson Eco Solvent, 8 colours rolls only

Rigid Media: Up to 123" wide x any length
Maximum substrate thickness: 2"

Roll Media: Up to 123" wide
Edge to edge full-bleed printing

Ink: LED and UV Curable Ink includes Black, Cyan, Magenta, Yellow, Orange, White and Gloss Spot or Overall Varnish
Eco Solvent Ink includes Black, Cyan, Magenta, Yellow, Orange and Green

SCREEN PRINTING

• 1 Col. Press Serifast
  Maximum image 44.5" x 69.5"

CNC DIE-CUTTING

• Kala Arkane D
  Hot & Cold Laminator
• Kala Applikator Flat Bed
  Laminator & Mounting Table
• Hot or cold lamination/
  encapsulation up to 65" wide

FINISHING

• Guillotine/maximum 110" width
• Matic Ares Plus 14' Welder

Fuji Inca Onset X1

CJ GRAPHICS
COMMUNICATION SOLUTIONS

CJ SMALL FORMAT DIGITAL
A Division of CJ Graphics Inc.

Variable information printing allows you to target each customer with a personal and direct message, increasing their engagement and driving sales.

Our print-on-demand service lets you print only what you want, when you want and our web-to-print portal allows you to specify and order print from anywhere. We've streamlined the print process for convenience and speed, while maintaining the premium quality CJ Graphics is known for.

STATE-OF-THE-ART DIGITAL PRESSES

• Our sophisticated equipment enables faster turn-arounds, smaller print runs, complex mixed media and variable information direct mail campaigns.

• Our expert staff is ready to help you get the most out of digital printing. We'll work with you to streamline your print process, leaving you more time to build your productivity and sales.

DIGITAL SERVICES

• We are experts in personalized marketing, short-run book printing, transactional communications and all the other niche markets that digital printing offers robust solutions for. We can add value through sequential numbering and coding, giving you the tools you need to track call-backs and pinpoint your best markets.

DIGITAL PRINTING

• 2 x Xerox iGen5 150 with Matte Toner and 24pt heavy media kit 3 additional colours (Orange, Blue & Green) Plus White Toner and Spot Clear Coating – 14.33" x 26"

• Xerox Iridesse, Colour and Black with Clear Coating, White, Metallic Silver, Metallic Gold. Maximum automatic size – 13" x 19.2" Maximum manual sheet size – 13" x 47.24"

• 2 x Konica Minolta Bizhub Pro 1250 Black only – 12.7" x 19"

• 3 x Kodak Digimaster HD 150 Black only 18" x 14"

• Digital Kodak Press, E-150 with MICR Capabilities

ON-DEMAND PRINTING

Print only what you need; when you need it. Eliminate the need to maintain large inventories of printed collateral or promotional items by streamlining the re-ordering process. Also savings can occur and you may avoid using outdated materials.

BINDERY SERVICES

We have in-house a complete line of bindery and finishing equipment to produce your most complicated project including: Laminators, Stitchers, Folders, Perfect Binders, Laser-guided die-cutters, Drills and Guillotine.

VARIABLE DATA PRINTING

Variable data printing gives you the power to connect with thousands, on an individual basis. By using our in-house data experts, we can optimize your database creating excellent results with personalization.

DIRECT MAIL SERVICES

From one piece to thousands, CJ Digital has a Direct Mail program in-house to meet your needs. In late 2017 we purchased one of the largest Mailing houses/Direct Mail companies and moved it inside our new facility.

For over 60 years ACME has earned a reputation as a responsive and highly-reputable ticket manufacturer. Today the company still maintains this status by putting the customer first. We strive to be innovative and creative in our approach to offering print solutions. Our customers have come to depend on ACME as a service and solutions oriented company.

ACME continues to grow with, and ahead of, the industry by offering new services and products, as well as adopting the latest technologies in integrating our offerings with the workings of the companies that we provide for. It is of paramount importance to us at ACME to be a driving force within our industry and continually offer our customers and partners a product that they can utilize to represent themselves with pride.

DIGITAL ADVANTAGE

ACME Digital Advantage provides the ability to offer next-generation season ticket products with the latest available technology and special effects.

What is a Next-Generation Season Ticket Book?
The digital printing process offered by ACME Digital Advantage enables us to add dynamic features to ticket development. It's not just about creating a great looking ticket book anymore, it's about creating a great book that offers customized information and branding. Just-in-time printing and shipping allows a longer sales window in the lead-up to a season.

Just-In-Time Printing Process
By separating the printing process into multiple production runs that are produced and shipped as the ticket books are paid for, the final crunch of 'press time' is eliminated.

SERVICES

Art and Design
Our graphics department provides creative original pieces for our customers and works with them to ensure their creations are of the highest quality.

From design conception through to completion, our graphics department can assist you at any stage of the design process to help put your thoughts into reality.

In-House Prepress
Our prepress department is committed to mastering the rapidly changing electronic technology, which makes producing high-quality season ticket books possible.

Data Management
ACME is able to offer its customers complete personalization. With the use of our digital technology, ACME is able to fully customize data and images so that our customers can target their audiences with specific messages. We print barcodes and serial numbers, unique to each ticket. Custom printing according to your variable data is our specialty.

Fulfillment and Distributio
ACME provides inventory management, fulfillment and mail services for customers seeking to achieve savings and/or efficiencies within their existing print and fulfillment requirements. In our facility we have our own international shipping and distribution centre, so let us take responsibility for the fulfillment of your orders. Through us, you can focus on what you do best.

Online Solutions and Portals
With our proprietary CJ Drive we can build a portal for all your season ticket needs. This portal allows your season ticket holder to customize their ticket order with their own corporate logo on the front or back cover for an additional cost.

CJ GRAPHICS
COMMUNICATION SOLUTIONS

CJ MUSEUM
A Division of CJ Graphics Inc.

Our talented team of in-house developers has a proven track record of implementing cost-effective web-based solutions to improve your business processes. From content management systems for keeping your website up to date, to full marketing order portals using our proprietary CJ Drive® platform, to completely customized web applications tailored to your business needs.
Our team brings years of experience and a wealth of ideas to the table, to help you streamline your online operations and remove headaches from your day-to-day workflows while saving you time and money through automation and "always on" access to the info and tools you need.

CJ DRIVE® ONLINE ORDERING SYSTEM

CJ Drive® is a custom-built (using our team of in-house programmers), proprietary online ordering and management tool for marketing materials, corporate stationery, printed collateral and a whole range of customized promotional materials. It is streamlined access to the printed or produced items that bear your name and message and drive your business where you want it to go, saving time and money.

CJ Drive® allows you to customize common marketing materials – from point of sale items like posters, banners and table-tents to corporate brochures, letterhead and business cards – with text, images and logos, allowing your staff to quickly and easily procure head-office approved creative online, 24 hours a day. Add this to our efficient digital print solutions and you can have completely customized/regionalized material in the hands of the employees that need it within 48 hours.

The best part is that your users can only customize the areas you've designated: For example, they might be able to add their own portrait and contact information to a sales sheet, but they can't change the colours, fonts or revise the copy unless you've allowed them to, locking down your corporate branding standards. Plus, with CJ's high standards of print-quality you never have to worry about inconsistencies in stock or corporate colours that may occur when materials are printed with different suppliers across the country.

We offer services directly or through agencies or through partnerships.

OTHER CJ INTERACTIVE SERVICES INCLUDE:

- eCommerce Solutions
- Personalized Websites (PURL)
- Digital Publishing – eBooks
- Digital Publishing – Flipbooks
- Custom Web Application Development
- Marketing Solutions

3D Colour is Canada's best source for 3D printing technology, from the user-friendly MakerBot series of 3D printers to the amazing Mcor IRIS – an eco-friendly, full-colour 3D printer that uses paper to print beautiful 3D prints. Our Mississauga showroom features both MakerBot and Mcor devices, letting you view and experience the technology firsthand.

MCOR FULL-COLOUR 3D PRINTERS

Mcor Technologies envisions a future where everyone can easily turn their ideas into low-cost, full-colour, eco-friendly 3D objects. Providing accessibility to a once niche technology is the driving force behind Mcor's IRIS line of 3D printers. Based on Selective Deposition Lamination (SDL) technology, they are the only 3D printers to use paper as the build material, creating durable, stable and realistic models, enabling you to:

GAIN COMPETITIVE ADVANTAGE

• Shorten design cycles and time to market by printing numerous 3D models as needed in your office.

CUT COSTS

• Discover and fix design errors early.
• Reduce costs for prototyping and tooling.
• Decrease travel to production sites.

INCREASE SALES

• Take realistic 3D models to prospects, sponsors, events and research groups.

3D PRINTING

CJ Interactive operates advanced 3D print devices on-site, outputting both single colour plastic and dynamic, full-colour three-dimensional prints.

Whether you are creating a custom art piece, a uniquely personalized gift, a prototype for a new product or a replacement part for your home or office, 3D printing offers a variety of exciting possibilities for producing physical objects from your digital designs.

Our Mississauga showroom, located just off the Queen Elizabeth Way, features both MakerBot and Mcor devices, letting you view and experience the technology firsthand.

Contact us today for a demo!

MAKERBOT 3D PRINTERS

Explore the exciting possibilities of the desktop 3D printing revolution! MakerBot printers use PLA plastic filament to produce 3D objects, and are great for creating prototypes in professional and educational settings, or for making fun gadgets for the home. Available in a variety of sizes and price-points, MakerBot printers are reliable and easy to use for those interested in exploring 3D printing technologies.

FOR THE HOME

Use cutting-edge and affordable MakerBot 3D printing products and services to transform your home into an innovation hub for making unique décor, gifts, tools, parts, and other projects.

FOR THE PROFESSIONAL

Use MakerBot 3D printing products and services to bring your new mechanical, industrial, architectural, medical, or artistic designs to market fast.

WHAT CAN YOU 3D PRINT?

• Unique art, sculpture, gifts, prototypes, and décor for your friends and family.

• Replacement parts, hooks, handles, and more for the house and office.

• Customizable rings, medals, vases, and more with the MakerBot PrintShop app.

• 3D print free designs from Thingiverse.com or download MakerBot designs at the MakerBot Digital Store.

CJ Special Effect © is our digital enhancement service. We take pre-printed sheets from all three departments, litho, digital and large format, and apply finishes that engage with your audience and increase the impact of the finished product. Our ability to create unique, timely and cost-effective items is achieved through the use of our state-of-the-art digital finishing technologies

Our Scodix Ultra Pro with Foil machine applies a combination of CJ Hi-Lite, a raised UV polymer, and foils in textures and patterns to create tactile and visually impactful finishes. The use of variable data on the Scodix machine allows for truly unique and individually personalized foils and effects. We use a four camera system for 100% registration on every sheet.

The Highcon Euclid II+ is our digital laser die-cutting, creasing, kiss-cutting and engraving machine. The level of detail and complexity of cuts that are possible on this machine cannot be matched in the conventional finishing industry. Prototypes and multiple versions of finished pieces are now a reality through just the creation of different PDFs.

HIGHCON EUCLID II+

• 40" x 28" max – 12.5" x 18" min
• Coated, laminated and uncoated stocks
• 8-24pt label and paperboard stocks
• Up to 47pt microflute

SCODIX ULTRA PRO WITH FOIL

• 21.5" x 31" Max sheet size & 11.7" x 16.5" Min sheet size
• 19" x 29" maximum UV and foil image size
• We can run multiple coloured foils simultaneously
• Coated or laminated stocks only
  (some uncoated stocks have just been approved to run)
• 6-30pt

Faced with complex, ever-changing challenges, organizations realize that constant, ongoing innovation is critical to stay ahead of the competition. It is why the ability to think differently and generate a new idea becomes an important skill set.

CJ Innovation has been working actively and has cultivated this skill to give our clients a step ahead of the competition and a step further into the digital world.

CJ Innovation is currently developing in-house, advanced technology driven products such as 3 Dimensional Holographic Displays, Virtual Greeting Standees, Interactive Touch Screens, Video Magazines Advertisements and the use of Nano Lighting to offer our clients the latest advancements in advertising technologies.

CJ VIRTUAL GREETER©

The CJ Virtual Greeter v2 is an impressive information, branding and promotional messaging video which displays a holographic image projected on a life-sized cut-out that can help deliver a message, promote specials to drive sales or demonstrate products, with an electronic eye to turn it on and off.
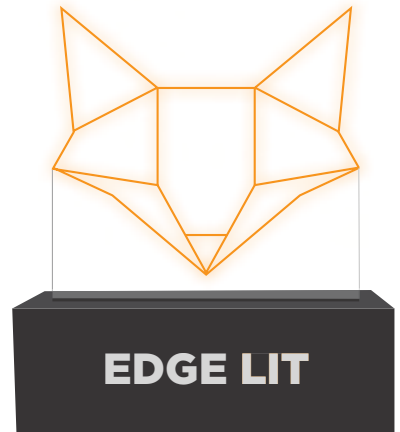

Model:
Lorena Urrutia-Mandarino

CUSTOM INTERACTIVE DISPLAYS

We design and produce custom display solutions to attract, educate and entertain the customer while enhancing the in-store experience.

WE CAN CREATE:

• eye-catching large window displays

• interactive video POS

• striking countertop stands

EDGE LIT

CJ HOLOGRAM DISPLAY©

This system displays 3D animation files which can be viewed from 360 degrees with stunning visual 3D effect. This piece makes an outstanding main feature to an exhibition or event, with an electronic eye to turn it on and off. Show off your product or messages as a 3D holographic projection, viewable from all angles.

**CJ Graphics Inc. offers Full Direct Marketing Services
We are truly a one-stop shop that can take your planned marketing programs from conception to completion while guaranteeing the best quality, service and turnaround times in the industry.**

We understand and will meet your need for creative problem solving, responsive and knowledgeable account management & customer service, flexible & flawles execution. Trust us with your next project, and we'll make sure everything comes together effortlessly.

Our expertise includes:

- Data Processing & Forms Design
- Digital B/W Laser Printing with MICR Capabilities
- Digital Full Colour Laser Printing
- Stringent Quality Controls
- PIPEDA Compliant
- Ink-Jet Personalization
- Full Lettershop Services
- Bindery & Finishing including Tipping, Tabbing & Polybag
- Offset & Envelope Print Management
- Response Management & Fulfillment
- Canada Post and USPS Mail Preparation and Delivery
- Production Auditing and Controls using Automated File Based Tracking
- Automated Reporting and Job Status

As active members of the Canadian Marketing Association (CMA) and The Mailing and Fulfillment Service Association (MFSA) we are current on all major issues, policies and practices specific to our clients and our business.

DIGITAL PRINTING

- 2 x Xerox iGen5 150 with Matte Toner and 24pt heavy media kit
  3 additional colours
  (Orange, Blue & Green)
  Plus White Toner and
  Spot Clear Coating – 14.33" x 26"
- Xerox Iridesse, Colour and Black with Clear Coating, White, Metallic Silver, Metallic Gold.
  Maximum automatic size – 13" x 19.2"
  Maximum manual sheet size – 13" x 47.24"
- 2 x Konica Minolta Bizhub Pro 1250
  Black only – 12.7" x 19"
- 3 x Kodak Digimaster HD 150
  Black only 18" x 14"
- Digital Kodak Press, E-150 with MICR Capabilities

CUTTING

- 2 x 45" Polar Programmable Cutters, with Complete Cutting System, Stacker, Jogger, Weigh Scale, Trans-o-mat
- Guillotine/maximum 110" width

FOLDING

- 4 x MBO Folder B30-C
- 2 x MBO Folder T530-C

FINISHING INSERTERS

- 2 x Buhrs Highspeed Inserters BB700 with Camera match and verification
- 4 x 6 Station Swing Arm Inserters with 9" x 12" Capabilities
- 3 x Kirk Rudy Tabmaster with wide label kit
- Kirk Rudy Servo Tipper, 497 Servo Tipper
- Kirk Rudy STS Gluer – (2) head fugitive
- C.P. Bourg Perfect Binder, BB3002
- Shrink Wrapper, Sealmatic 56-T
- Poly-Bagger, RBS
- Kirk Rudy – NetJet Large Format Multi-Head Highspeed Inkjet
- Buskro – BK600 Inkjet System
- Kirk Rudy – NetJet Inkjet System
- Axode Camera Match System
- 3 x Mosca Strapper
- Strappack
- 2 x Kirk Rudy Bump Turns, 415
- 2 x RBS L BAR Poly Sealer, MM & EM

CJ GRAPHICS
COMMUNICATION SOLUTIONS

CJ FULFILLMENT &
LOGISTICS SOLUTIONS
A Division of CJ Graphics Inc.

Our dedicated team strives to maintain the highest industry standards in the preparation and delivery of all our customers' finished goods.

FULFILLMENT TEAM

Our Fulfillment team is part of our "Value Added" customer oriented business strategy. Once you have decided to print with us, why not take advantage of our in-house 50,000 square feet Warehousing/Inventory Control and Pick and Pack services. With competitive storage and order processing rates we can remove any of the unnecessary overhead costs associated with large marketing campaigns.

We create and administer customized web-based interfaces that allow our customers to place orders online from their desktop that go directly to our Fulfillment team for order processing and shipping of any stored materials in our "Print Specialized" warehouse environment. This enables a more direct and efficient method of supplying your business requirements in a timely and cost-effective manner. We can also create/build customized reporting for whatever your requirements are using our online proprietary software in-house.

From our own fleet to small courier companies, CJ Fulfillment & Logistics Solutions ships with virtually everyone. Whether you require FedEx, Purolator or UPS shipments, our division has permanent and dedicated terminals to ship with all three major carriers which include fast tracking and proof of deliveries whenever needed. Whatever your carrier preferences are, CJ Fulfillment & Logistics Solutions will accommodate.

OUR FLEET

• 2013 International/4300 5 Ton Truck
• 2008 Freightliner 5 Ton Truck
• 2015 Hino 185 Single Axle Automatic, Box Truck
• 2012 Dodge Ram, Van
• 2008 Toyota Sienna, Van

We work with several large and small shipping companies for overflow as well to meet all our clients' needs.

ON-SITE RECYCLING

Our on-site recycling facilities enable us to remove any concern about the proper disposal and environmentally-friendly reclamation of your intellectual property. CJ Fulfillment & Logistics Solutions takes great care and effort to ensure a multitude of media materials is recycled properly. What makes great environmental sense also makes great business sense!

ARTWORDS artwords
A Division of CJ Graphics Inc.

Artwords is a division of CJ Graphics Inc., one of the largest privately-owned award-winning communications and graphics solutions firms in Canada.

Working directly with ad agencies and designers, the Artwords team is able to provide complete creative support, ranging from full development of initiatives to simple changes and updating of existing material, helping to meet the tightest deadlines and providing clients with services fitting their unique requirements.

Specializing in a multitude of mediums, our experience within the industry allows us to offer unique solutions and provide services for all phases of print. This can be in the form of laser die-cut visuals, unique foil and coating applications or other new initiatives. Artwords' full-service production includes in-house proofreading, engineering, and creative while working with the best technology available, including a production studio capable of developing 3D models using the latest 3D printers.

THE LATEST TECHNOLOGY

We use high-resolution digital UV Curable flatbed printers, roll printers, fabric printers, vinyl and dimensional cutters, and a full range of the latest sign making systems.
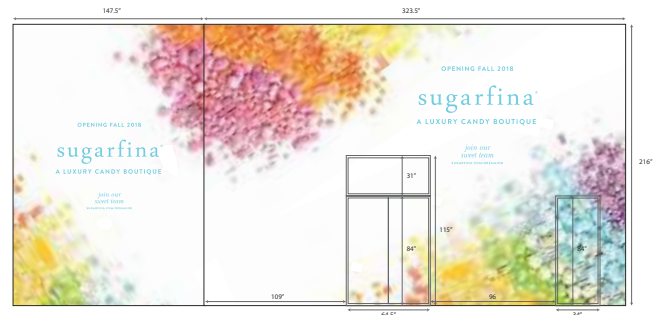

It is said that a picture is worth a thousand words. Let us help convey those words, capture your audience and improve your business. A quality image is essential to sell your product in the modern multimedia marketplace, therefore the shot needs to be exceptional. Our photographic services can do just that. We can accurately capture your award-winning piece, original artwork or retail product and supply you with high resolution digital image files.

What we offer:

- High resolution photographic image capture with one of our Full-Frame FX Format cameras.

- Elinchrom portable studio lighting system.

- Product shots and installation shots are available on-site or off-site for your convenience.

- Colour correction, image retouching and manipulation to enhance any new or existing imagery. Whether it's for print or multimedia, our goal is to give you the highest possible image quality at competitive rates.

PHOTO STUDIO

Utilizing our Nikon D800 Full-Frame 36 Mega-pixel cameras equipped with a Nikkor AF-S 24-70mm f/2.85F-ED Full-Frame Zoom Lens, we can produce images that achieve stunning detail and dynamic range. The resolution of these images is perfect for use in everything from printed brochures, websites and large-format graphic displays. If you have an idea that requires images, we have the equipment and skills to help you take it from concept to perfection.

Let us show you how we can make your art or product shots come to life and add vibrancy to your marketing materials.

Call to request a tour of our facilities today.

PHOTO STUDIO EQUIPMENT

- Nikon D800 Full-Frame 36 Mega-pixel cameras equipped with Nikkor AF-S 24-70mm f/2.85F-ED Full-Frame Zoom Lens

- Fujifilm FinePix S5 Pro equipped with AF-S DX NIKKOR 18-55mm f/3.5-5.6G VR II and Sigma 70-200mm f/2.8 EX DG OS HSM Lens

- Elinchrom portable studio lighting system with and without flash attachments

- Apple 27" iMac with photo editing software

- Scitex Eversmart Series II Flatbed Scanner

CJ OYSTER PUBLISHING
A Division of CJ Graphics Inc.

CJ Oyster Publishing provides custom publishing services and produces a range of magazine titles.

CUSTOM PUBLISHING

CJ Oyster Publishing is dedicated to meeting the increasing demand for short-run books and on-demand or just-in-time publishing, eliminating many of the barriers to self-publishing.

Whether you are an established or first-time author, artist, or photographer, you can leverage our services to publish and distribute your work. We print and publish limited edition prints, books, creative catalogues and photography.

OUR SERVICES

State-of-the-art Printing, from single-copy to large-run lithography to digital e-books. We work with the most creative designers and production teams to bring your vision to reality.

Distribution support with multiple online channels to help drive sales.

Value-added Services including online selling options; providing information about funding resources; subsidizing costs through co-publishing deals (as approved by our editorial board).

Designedge Canada

Designedge Canada informs, inspires and celebrates Canada's professional design community. We are a multi-faceted media outlet and everything we do is packaged in a style worthy of our creative audience.

Jobedge
The Designers Job Board

Our job board is the leading creative talent resource in the country. Job posting is easy with our simple interface and convenient 24/7 online self-serve order form. Jobedge offers double exposure: the Jobedge website, and tweets to an audience of over 8,000 followers.

CANADIAN Food Aficionado MAGAZINE
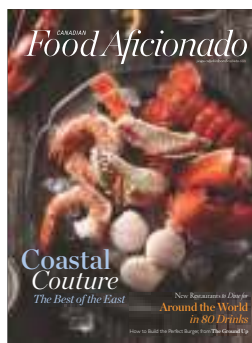

Canadian Food Aficionado is a new publishing venture for all food lovers with a guide to the best food and dining experiences in Toronto and Southern Ontario, from the fanciest restaurants to the funkiest burger joints. Distributed to high-income households in the GTA region, and through airline lounges, leading hotels, restaurants and events, ensuring we deliver the right target audience for you.

SBC Media is a division of CJ Oyster Publishing, the largest publisher in Canada of action sports media brands. Our titles are iconic brands with an engaged and loyal audience.

PRINT

Our magazines reach more than 490,000+ action sports enthusiasts, via bulk mail to specialty retailers, events, subscriptions, and on national newsstands. Our pages stand out with superb photography and extremely high production values.

DIGITAL

With a combined reach of 4.5M+ our websites have been designed with an emphasis on expanding the user experience, regardless of the platform, and keeping them engaged with our daily content. We provide a large variety of marketing opportunities tailored to meet a range of campaign objectives and budgets.

SOCIAL MEDIA

With over 285k followers through Instagram, Facebook, and Twitter, SBC Media has one of the largest reaches in Canadian action sports media. There are a variety of opportunities to target our audience through contests, custom content, product previews, and more.

OUR AUDIENCE

Our audience is the coveted 15-35 age group with high household income – young and savvy trendsetters.

CJ ENVIRONMENTAL INITIATIVES
A Division of CJ Graphics Inc.

CJ Graphics Inc. is dedicated to the promotion of innovative business practices that minimize our impact on the environment not because it's smart business but because we feel it's the right thing to do!

CJ Graphics Inc. continues to be recognized for its commitment to sustainability not only by our clients but also through award contests and our Industry. Practising environmentally responsible manufacturing printing has always been important to us.

We collect and recycle all paper waste in the production cycle, including pre-production trimmings from paper cutters and post-production waste, including corrugated cardboard, from printing and binding operations.

All our production facilities are computer controlled for heat, air-cooling and humidity to ensure optimal energy efficiency. Unprinted stock remaining after a job is completed is donated to local hospitals, day care centres, schools, colleges and community groups.

We also aggressively recycle all plastic and aluminum beverage cans. We support Green Shift™ and their endeavours to leave a smaller carbon footprint.

We are members of several professional printing organizations, which actively pursue environmental concerns at the Provincial and Federal Government levels.

- Solar Panels on roof for hot water – *First printer in Canada*
- Wind Turbines power outdoor lighting – *First printer in Canada*
- LED and T5 fluorescent lighting throughout – *One of the first printers to adopt*
- BioDerived Ink
- Automatic Ink Dosing
- Recycling of all paper waste
- Recycling unused stock
- ML Humidification
- Computer-to-Plate with chemical recycling
- Remote Online Proofing
- Reverse Osmosis Water
- Hydro Conditioning
- The BioDerived INK, SolarEnergy and Wind Power programs were designed and trademarked for CJ Graphics to promote our environmental responsibility which continues to surpass our industry's standards. These logos are for the exclusive use of our clients.

TECHNOLOGY

Hanna Paper Fibres Ltd.
is proud to award this
Certificate of Achievement in
Corporate Social Responsibility
to
CJ Graphics Inc.
for their significant role in the preservation of our planet's diminishing resources.

It takes 19 trees to manufacture one metric tonne of paper and approximately 98 cubic feet of landfill space to dispose of this paper.

CJ Graphics Inc. was solely responsible for the preservation of 7,708 trees and the saving of 36,512 cubic feet of landfill space during the calendar year.

We heartily congratulate CJ Graphics Inc. for their responsible attitude toward a promising and productive future.

George Miller
CEO

" The environment has always been important to us at CJ Graphics Inc. We were one of the first printers in Canada to switch to BioDerived inks, as well as adopt solar energy and windmill-generated electricity. We believe that if we all do our part to reduce our footprint, the world will be a better place!"

CJ GRAPHICS
COMMUNICATION SOLUTIONS

CJ GRAPHICS INC. OUR ENVIRONMENTAL POLICY & INITIATIVES

Electrical:
- All our plant manufacturing AC units are specifically just for AC so we are able to shut them down for many months of the year saving energy which allows us to be more efficient. Separate radiant heaters throughout the building provide more efficiency and reduced energy usage.
- Eight large 24-foot ceiling fans provide additional energy savings and are individually controlled helping with climate control.
- Two small windmills are being installed to power outdoor lighting and servers. Additional solar panels are being installed to feed back to the grid.
- Solar panels are used to heat our hot water. We are also looking to install a large wind turbine.
- Lighting has been replaced with LEDs.
- All hallways and washrooms have been equipped with motion sensors, saving energy and electricity.
- All computers are shut off if not being used for 60 minutes and shut off automatically on the weekends and after hours.
- We have ordered newer copiers that have a two-sided option and power save mode. This saves on paper and electricity.
- Where fuels and electricity are used in our operational processes, we implement efficiency initiatives and procurement practices and endorse renewable energy.

Certifications:
- We have created and trademarked 3 environmental logos that our clients can use such as solar energy, wind power and bioderived ink. These logos are copyrighted and registered.
- In regards to Sustainable Forestry, we mandate that the manufacturers & distributors we buy our paper from keep forested landscapes forested, maintain ecosystem services, protect raw materials for wood-based products, prevent illegal logging and comply with all external forest sustainability certification standards (examples: FSC, SFI, PEFC).

Consumables:
- All our metal plates are recycled as well as all pop cans and any other metals that are used in the production of clients' jobs.
- All our inks are soya based and bioderived inks with the lowest amount of VOCs.
- We recycle all waste paper. Any extra off cuts are donated to local schools, daycare centres and our summer camps at our Not-For-Profit skatepark.
- Because we're using the latest technology and automation in our manufacturing equipment, we have very little spoilage and waste.
- All waste material from 12 photocopiers and 24 laser printers is recycled. If printed single-sided only, the other side is used.
- We are members of the Green Team for ink and chemical recycling via Greenflow Environmental. Waste inks and chemicals are repurposed for other manufacturing needs or recycled responsibly.
- Our Environment Waste Management of hazardous and non-hazardous waste from operations, including recycling, reuse and ultimate disposal of company waste streams complies with all government regulations.
- All toner cartridges are recycled.
- Ink bags from the large format equipment are recycled.
- Employees and the environment are protected from the release of hazardous chemicals due to vandalism, fires, explosions or significant weather events. We ensure our facility has safeguards in place to prevent the release of chemicals, products and by-products.
- In our manufacturing processes where any hazardous materials are used, we adhere to all federal and provincial government regulations.
- We are managing and monitoring air emissions from our operations and comply with all government regulations.

Water:
- We have drinking fountains with bottle fill stations to reduce plastic bottle usage. There are indicators on the drinking fountain machines that show exactly how many plastic bottles are being saved from landfill.
- Water Management is used in our manufacturing processes. We have reverse osmosis and wastewater treatment in our facility and practice compliance with all government regulations.

CJ GRAPHICS
COMMUNICATION SOLUTIONS

CJ GRAPHICS INC. SECURITY PROTOCOL & PRIVACY PROTECTION POLICY

Here at CJ Graphics Inc. security is of the utmost importance, which is why we employ high-grade protocol at our facilities to ensure the safety of our clients' information.

We have a full-time receptionist during regular business hours and all guests are required to sign in upon arrival, and out following their visit. Our facility uses FOB-only access with a state-of-the-art alarm system that logs data at all equipped doorways and is monitored by an outside security company 24/7. We utilize motion sensors in key locations throughout the building and have multiple DVRs which record from our 36 high-definition cameras as part of an extended surveillance system.

We are also equipped with policies and procedures for data security. Our clients' data is password protected by client and stored on secure servers located in a dedicated secure server room with limited staff access. The room is climate-controlled and equipped with fire suppression. We use a separate secure network with updated firewall protection for work requiring data security. As well, backups of the data are stored offsite.

All of our staff here at CJ, whether full- or part-time, go through regular training protocols and sign all confidentiality agreements.

In terms of client materials, they are held only until client approval has been granted, after which time they are disposed of, or – for a minimal fee – shredded on site in our facility. We are also equipped with a secured area designated for clients' finalized products. This area is only accessible to four members of the CJ staff, all of whom must be accompanied by a supervisor or manager during entry.

Security Policy & Standards

- Clixx is a Division of CJ Graphics Inc. and is current with all federal and provincial legislation and industry practices for security and privacy.
- Our security policy is reviewed on a quarterly basis during regular management meetings to ensure procedures are up to date.
- Follow-up sessions with all staff to ensure changes and updates are passed on.
- Access to information, and business processes are controlled based on business and security requirements, with the principle of "Least Privilege". All users have minimal rights to the network and folders, and are configured for Domain Access.
- Hierarchy is in place for Administrative rights. Only the IT Manager/System Administrator will have access Level 1 clearance. All other users are restricted to individual folder and/or group folders.
- Each folder contains user/group security privileges. These folders reside on a separate hard drive not associated with the root drive or operating system folders. The root folder is only accessible by the System Administrator.
- NTFS with Enabled Encrypting File System is used on all computers and servers within the network. This format supports file level security and limits access to non-privileged users.
- Physical security of all computers is secured via system card access to the data area. The data processing area is itself a separate area of the building also with restricted card access.

- Guest accounts are disabled.
- Users and groups are periodically reviewed and modified as required on which user is permitted to view and/or edit files within production folders.
- Users' privileges are granted on a "Least Privilege" access methodology and the System Administrator has privileged access. Users cannot see each other's folders. A common folder is available where information is temporarily available for all users to view and/or modify.
- The "Everyone" group is replaced with Authenticated Users on files and folder shares.
- All passwords are unique and have a life span of 90 days unless modified by the System Administrator. Passwords must be no less than 8 characters in length and contain alphanumeric values.
- Computers DO NOT have read/write access to CD/DVD writers, USB drives and their BIOS are locked to prevent copying of client data files to external media.
- Password policy is dictated by our security policies. This policy contains the 3-strike model for policy violations.
- Security Level 1 users are required to contain special punctuation and special characters in the password and the life span is limited to 30 days.
- A separate "Administrator" account is created on local computers with no privileges. A more complex 10-digit password administrative account is enabled for auditing and review of logs for use and activity.
- Only required services are installed on servers and desktops.

Data Integrity and Confidentiality is Ensured

- Strict QC procedures are in place to ensure correct files and forms are used and random data sampling is produced before any job is approved for live production. Client approvals are required at all stages of data processing and before variable laser or inkjet personalization begins. PDF lives and/or hard copy supplied with accompanying data samples to client for approvals.
- Only authorized users access production folders.
- Audit logs are enabled to monitor access of files.
- Strict QC procedures are followed and routine checks and approvals are required at all major data steps.
- Data sampling is randomly taken and forwarded to our clients in PDF or hard copy format for their approval.
- All computers including servers have anti-virus/malware/ransomware installed, and they are configured to check hourly and zero day for updates and to apply the updates automatically.
- All computers and servers are monitored on a regular basis to ensure security measures are intact and functioning properly.
- Various tools are used to monitor the systems and event logs.
- All desktop computers are configured for automatic software upgrades.
- On servers all updates are downloaded, reviewed, and tested independently before implementation on main servers.
- Servers are VM based and complete server images are taken daily using Veeam to create VM images before any upgrades are applied.
- Production computers are cloned to ensure the same configuration is maintained during software installations. This step ensures that all data computers will react in the same manner during data processing.
- Only the System Administrator has access to the system logs. These logs are reviewed on a regular basis.

- All personnel are assigned a corporate security clearance based solely on job role.
- 4 Levels exist:

  - o Level 1 – Network Administrator
  - o Level 2 – Senior management
  - o Level 3 – IT staff – data programmers
  - o Level 4 – All other staff

- PGP file encryption is incorporated for added data security.
- All users/groups have all resources and data restricted by default for viewing and editing, unless they have specific requirements. Password policy is dictated.
- The Network Administrator manages privileged IDs after security clearance is obtained.
- Backups are recycled after a minimum of 3 months.
- Tiered firewalls are in place. Bitdefender Endpoint Security at the gateway, servers, all desktops/laptops, Cisco Meraki firewall and managed switches are part of the network backbone, as the main first line of data security defense.

Personnel Security

- References are required, and all documentation is properly reviewed and verified.
- For high security programs, new employees may be required to provide certification of a police record check.
- Personal and previous employment references are verified.
- Current CJ Graphics (Clixx) Data Processing Employees are seasoned veterans of this industry with proven track records.
- All new hire staff that have access to and/or manage client data information go through some background screening.
- CJ Graphics utilizes comprehensive employment contracts including:
  - – confidentiality clauses
  - – reference to security responsibilities
  - – reference to health and safety responsibilities
  - – penalties/disciplinary proceedings and legal due process for non compliance
- Any person in the facility who is not known is accompanied by an employee or, if not, is stopped and required to identify themselves.
- All staff (including new hires) are trained in the security measures outlined above.
- All staff must, by security process design, adhere to security policies.

Physical Security

Physical security/access to both the building and to the data centre are access controlled by a Digiplex EV096 Access System. This system utilizes electric door strikes combined with proximity card access readers and door closers. The system is designed to restrict access to both the data centre, as well as the main office area where the CSRs (Customer Service Representatives) work. The CSRs may have live samples, data dumps or other private data matter on or about their working area so all access to those areas is restricted access only. The access system is also utilized at the plant employee entrance as well as the security cage area in the plant. The System Administrator creates access cards for all staff and ensures access is denied to unauthorized personnel. CJ Graphics also currently utilizes an internal & external camera video DVR surveillance system that digitally records 24/7 and has remote Internet access. The system currently utilizes three cameras located in the security area, plant employee

time-card area and the security lock-up area. At CJ Graphics, physical security is also controlled by preventing unauthorized damage and/or interference to business premises by:

- Keyed or pass card entrance only into building.
- All visitors are required to sign in upon entering and sign out upon leaving premises and must always be escorted by a CJ Graphics employee.
- Video monitoring and motion detection throughout the building.
- 24/7 security monitoring.
- Sensitive processing areas segregated with controlled access.
- Adequate fire protection.
- Physically segregated data processing area and server room within the building.
- Access to the computer room(s) restricted to authorized persons.
- Access by external personnel (service and telecom engineers, cleaners, etc.) restricted and supervised.

Prevention/Detection Building Protection

- Outfitted with an alarm system and monitored alarm company.
- Fire sprinkler system throughout building and fire extinguishers at all doorways and exits.
- Automatic fire suppression system is directly interfaced into the A/C & heating system.
- Motion detection throughout common and computing areas. Main areas are monitored using security cameras and digitally recorded.
- Visitor building access through front desk: visitors are logged and receive a badge for the duration of their visit.
- Multi-Level swipe card access for employees only.
- Data department room secured via swipe card access for data department, project managers and management admittance only.
- Server room with additional security via swipe card access.

Computing/Data Storage Protection

- All staff must sign confidentiality agreements. Background checks required for staff handling sensitive information.
- All servers and print production equipment are UPS protected (uninterruptible power supply).
- User data and resource allocation is centrally allocated by network administrator only.
- Anti-virus software installed on all computing equipment via Bitdefender Endpoint Security.
- Cisco Meraki version of Firewall and Bitdefender anti-virus software is used at the server level and at all desktops.
- Updates to all anti-virus software are performed hourly and zero day daily through the network.
- Virus scans are performed via Bitdefender at the workstation and server level. This platform is centrally managed by the server and automatically alerts the System Administrator of any detections.
- Infected workstation is immediately quarantined and removed from the network to prevent further spread. Additional scans of remaining workstations are performed to identify extent of outbreak.
- Infected workstation/server is cleaned of virus, updated and reconnected to the network. If the workstation cannot be cleaned using software, it is partitioned and reformatted to wipe out all remnants of the worm. This system is updated using backed up data and reconnected to the network.
- Because this workstation has been compromised, user right restrictions are placed to prevent further instances.
- All servers and network components racked appropriately.

System & User Password Policy

- User authentication via username/password in varying combinations depending on security level needed for data and/or application.
- Only authorized operators have access to customer databases. Permission given by the Network Administrator. Users without permission are unable to access any customer data.
- All passwords are set to expire following a 90-day cycle. All server passwords contain alphanumeric and shift key components. The passwords are controlled by the main Primary Domain Controller Server. Intruder detection is enforced in the passwords.
- User attempting to access the network via a user terminal (PC or Mac) and enters the password incorrectly 3 times, results in user name and entry point being disabled for a period of 24 hours.
- In case of intrusion, System Administrator and/or management team is notified electronically, logs are monitored to determine what files were accessed, investigation is launched to determine extent of security breach. System is shut down at this time to prevent further access.

Firewalls

- The network is protected by a Cisco Meraki Next-Gen Firewall with intrusion prevention, malware protection and content filtering. Bitdefender Endpoint Security protects the client and server endpoints. This system provides secure encrypted VPN tunneling which protects a secure connection to outside remote users when connecting to the corporate network. When remote users connect via the VPN, the outside ports (FTP, Internet (www), etc.) are turned off, giving them no access to the outside world, thus protecting the corporate systems from outside attacks via remote connections.

Backup Process

- Backup and recovery procedures are part of a complete, backup system using Veeam VM image backup software.
- Daily VM images are taken of the servers and kept.
- Data is stored for 3 months after final mail date unless otherwise specified by client.
- Redundant backup location in case of widespread natural disaster.
- Retrieval via secure VPN connection.
- Copies of software are retrieved from backup, purchased or downloaded (Microsoft Office, Planet Press, Visual FoxPro, Streetsweeper).
- Workstations prepped with required software for business continuation.
- Backup files restored via VM images, hard drive and/or CD/DVD.
- CJ Graphics truck and van used to shuttle material between DR locations.

Professional Fundraising Auctioneer

Over the past 27 years, Jay Mandarino has raised more than 50 million dollars for hundreds of charities worldwide by performing as a professional auctioneer through his Not-For-Profit Corporation JBM Auction Services.

At his day job, he is President and CEO of 33 companies including the largest not-for-profit indoor air conditioned skatepark in the world.

The link called "Sightings" on his company's website **www.jbmauctionservices.com**, shows Jay with many of the celebrities that he has worked with, both professionally and philanthropically.

From Los Angeles to Miami to New York to Toronto, Jay has performed at events for David Foster, Sting, Gordon Ramsay, Ben Affleck, Michael "Pinball" Clemons, Eva Longoria, Jude Law, Michael Bolton, and Sir Elton John. Jay is an outstanding auctioneer and performer whose motto is, "Lend a hand, by raising yours."

Jay serves on the Board of Directors for the Learning Disabilities Association of Ontario and has served on the Pinball Clemons Foundation Board and many other worthy Boards. His philanthropic work has been acknowledged in many editorial articles, letters of praise and with numerous awards including three medals – the Diamond Jubilee Medal from Her Majesty Queen Elizabeth II, the Ontario Medal for Good Citizenship from the Lieutenant Governor of Ontario, recognizing individuals who, through exceptional long-term efforts, have made outstanding contributions to their communities, and the Order of International Ambassadors Medal. Jay was awarded Hero of the Year and the Urban Hero Award in the category of sports for his Not-For-Profit CJ's SKATEPARK.

CJ's SKATEPARK
— SINCE 2008 —
CANADA

CJ's SKATEPARK is a division of the Canadian Skateboard Park & School Association (a Not-For-Profit Corporation). Our mission is to engage and empower all children in the community including at-risk youth and those with special needs such as kids affected by Cancer, Autism, Down syndrome, Deaf, Asperger's, ADHD, OCD, LDs or any other challenge one might have. This is achieved in a safe and fun learning environment through recreation, development and mentoring in the sports of skateboarding, scooter riding, inline skating and other park activities.

FACILITY

CJ's SKATEPARK is the largest not-for-profit indoor climate-controlled skatepark in the world featuring Canada's largest indoor foam pit, 13' vert ramp plus an entire range of mini ramps including a 3' mini ramp/bowl with surrounding pump track on our upper "Tech Deck" Mezzanine, and a 5' mini ramp. The street area features obstacles including round and flat rails, step up gaps, A-frame and box gap, bank to bank, 4 and 8 stair set with hubbas and hand rails, bank to curb with granite and cement ledges placed throughout the street area. Our concrete bowl section consists of 5', 7' and 9' deep sections and is one of the largest indoor concrete bowls in North America. We are using Gator Skins, a premium surface material. Perfect for beginners to experts.

CJ's SKATEPARK features a state-of-the-art surround-sound system and LCD monitors throughout the park with over 30 high-definition cameras for monitoring. An air conditioned lounge and SONY PLAYSTATION room are available for birthday parties, private functions and corporate events.

We can take care of all your food and beverage needs at our concession stand serving Maple Lodge Farms chicken hot dogs, Pizza Pizza, Icee, chips, Gatorade, bottled water, juices and most of your favourite Pepsi drinks.

CJ's Pro Shop carries a huge selection of decks, wheels, trucks, scooters, helmets and safety gear.

We also have our own foundation where you can donate and receive a tax receipt helping others.

DEMOS AND LEARNING SESSIONS

Available for high schools, school fairs, cultural events and community organizations.

SPECIAL NEEDS PROGRAMS

Mentoring programs for special needs children (Autism, Asperger's, Deaf, Down syndrome, ADHD, OCD, LDs).

LESSONS AND CAMPS

• Private and group skateboard/scooter lessons with trained instructors
• Skateboard/scooter camps – Summer/Winter/PA days

SPONSORSHIP OPPORTUNITIES

There are many corporate and individual sponsorships with naming opportunities available. We offer extensive benefits and recognition as well as exposure to all of our kids, parents, spectators and the many community events we perform at.

CJ's SKATEPARK FOUNDATION MISSION STATEMENT

CJ's SKATEPARK FOUNDATION is a registered Canadian and American charity dedicated to the development of all children and youth through the benefits of skateboarding, scooter riding and inline skating, and making these sports accessible to everyone by:

1. preventing youth delinquency, addiction, substance abuse or mental illness through sports or activities;

2. improving and building self-confidence, self-esteem, emotional stability and well-being;

3. promoting physical activity, fitness and a healthy lifestyle through sports;

4. eliminating physical, psychological and financial barriers which prevent youth with special needs from participating in sports or activities, and youth with special needs including those with Cancer, Autism, Down syndrome, Deaf, Visually Impaired, Attention Deficit Hyperactivity Disorder, Obsessive-Compulsive Disorder, Asperger's syndrome, Dyslexia and other learning disabilities or any other challenge one may have.

Each year, we have over 150,000 kids participate in the programs we offer who come from various parts of the GTA and surrounding area. Our mandate is to never turn a child away – whether they need specialized one-on-one instruction, have physical, emotional, behavioural and/or medical challenges, or simply cannot afford skateboarding equipment and skatepark fees. We have offered specialized lessons during off-hours to accommodate children with Autism who are sensitive to loud noises, have given skateboarding equipment to those who cannot afford it, and we have also provided transportation to kids and families who do not have the means to come to the skatepark. We have and will always accommodate anyone in need.

ISCP/SKATZ©

The International Skateboard
Certification Program (ISCP/SKATZ©)
A division of the Canadian Skateboard
Park & School Association
(A NOT-FOR-PROFIT CORPORATION)

International
Skateboard
CERTIFICATION PROGRAM

ISCP/SKATZ©
(International Skateboard Certification Program)/
(Stance, Kicks, Axles, Transfers and Zen)
Provides a framework for assisting children and
youth to learn the art of skateboarding.

• Developing and maintaining a high level of safe, practical experience
  and knowledge of skateboarding.

• Developing the skills required to become a confident and knowledgeable
  skateboard instructor.

• Training and mentoring students and instructors to develop their
  knowledge of skateboarding.

• Meeting a high standard of quality skateboard instruction that parents
  can feel great about.

PROGRAM OBJECTIVES

The ISCP/SKATZ© Program provides a quality skateboarding progressive
teaching system for children and youth age 6+.

• 5 step progression which includes leadership training:

> **S** – Stance
>
> **K** – Kicks
>
> **A** – Axles
>
> **T** – Transfers
>
> **Z** – Zen

• Flexibility to tailor to student's individual progress.

• Recognizes key principles of child development.

• Emphasizes fun and learning.

• Includes a healthy lifestyle and nutritional education component.

PROGRAM ASSETS

This international certification teaching system program is for you
if you have built a skatepark and are looking for creative ways to
increase revenues while servicing community need.

• Ready made progressive program model and teaching system for
  you to market and generate revenues from your skatepark.

• The four level training program will qualify your staff to lead the ISCP/
  SKATZ© Skateboarding Progressive Lesson System. A model for safe,
  affordable program delivery.

• Employment opportunities for instructors that have a passion for
  skatepark activities.

• Geared for youth, this training and leadership program is just what you
  need to deliver quality skateboard programming.

• Value in being part of programming model that is tested and in place in
  other municipalities & cities.

• Demonstrate to Council and the Community your commitment to
  youth, your customers and skateboarding.
